

Telos Secure Networks Training Center and Technology Lab

Telos has established an innovative Training Center and Technology Lab at its Loudoun, Virginia campus. This center will help customers meet critical mission communications needs while learning about the full capabilities of Telos' Secure Networks Solutions. This center:

- ✓ Trains and certifies Government, DoD, and private contractors to ensure mission preparedness
- ✓ Has the capacity to accommodate up to 20 students for accelerated, intense, "boot camp," style training
- ✓ Features a 3,000 square foot, hands-on, demonstration and education center
- ✓ Samples of training offered:
 - Wireless network: Aruba, Cisco, Motorola, and Rajant
 - Wired network: from Cisco, Foundry, and Nortel
 - Satellite Technology from RaySat
 - Microsoft Surface Computing
 - RF Radio Interoperability technologies
 - Network Management and application software
 - Alternative power technologies
